

## Change Management Workshop

Today executives are the most important change managers. However, the methods of change management are still new territory for many. Hands-on trainings help executives to broaden their behavioral repertoire in managing change. Our offer is tailored to this. On the basis of your specific corporate practice, change skills are trained in a 2-day compact workshop or in longer-lasting intensive training programs.

**Change management is the core competence for executives in the 21<sup>st</sup> century.**

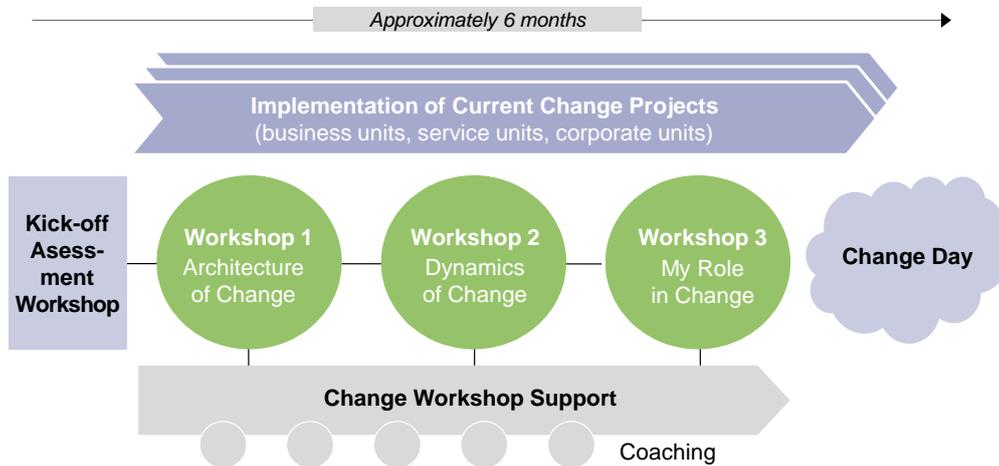

### Typical Cases

- A large change project is pending and a core group of executives or change agents would like to get prepared for it.
- In corporate groups or a large organization, change projects are managed at different locations, but there is a lack of common understanding and effective networking of change know-how.
- Change projects are having trouble getting started. Fresh energy and perspectives, new methods or personality development of key personnel is necessary to make real progress.

### Benefits

The change training program is customized to your situation. In compact workshops, customers learn what managing change is really about. Change agents and project leaders get to know specific methods and procedures on the basis of case studies. Participants have the opportunity to learn hands-on by working on their own situation and to consult peers for advice. After the workshop, these experiences can be immediately applied in practice.

## Example of a Change Management Intensive Training Program

### The training includes

New perspectives by experts / Case specific work on your own situation / Methods and tool training / Work on your own mental models / Group dynamic processes

### We support you by ...

- designing customized change management trainings.
- offering trial workshops for executives.
- organizing comprehensive change management training programs.
- coaching change projects and customer workshops.
