

Outsourcing and Public Private Partnership

The preparation and implementation of outsourcing and public private partnership (PPP) projects lead to a comprehensive change process. We support you with expert know-how and professional project management – from the initial initiative up to implementation of real operation.

More than 100 successful PPP and outsourcing projects make us the market leader in Austria.

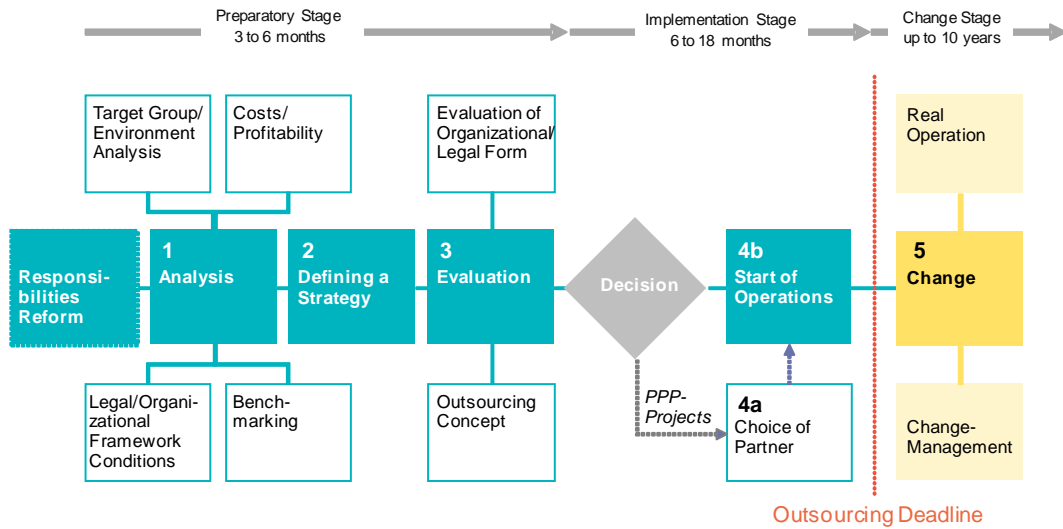

Typical Cases

- You think that you can provide public services more efficiently under private-sector conditions?
- You wonder which organizational and legal form is the best?
- Discussions about this do not lead to any solution?
- The decision on outsourcing has been made; however, it is not clear what is to be done?

Benefits

We offer a wide range of services from one source for all questions concerning outsourcing and PPP projects: not only specialist know-how, but also comprehensive competency on all relevant business management and organizational issues. Our strength lies not only in developing an outsourcing concept, but also in supporting the implementation of the operational business of the newly established legal entity. We structure complex outsourcing projects and work on the activities in the right order. We manage to successfully integrate all parties involved due to our years of experience.

The Ideal-typical Procedure Model

We support you by ...

- identifying outsourcing potentials.
- determining the optimal organizational/legal form by proven tools and methods.
- developing outsourcing and corporate concepts as well as feasibility studies.
- monitoring risk analyses and risk allocation processes during PPP projects.
- bringing in proven experts for selected topics.
- carrying out project planning and professional project management (incl. documentation) of the entire change process.
- preparing and moderating meetings and workshops.
- coaching project teams and (future) executives.
- supporting change management after implementation.
